

WE PROVIDE(Cont.)

PROGRAMS— We have published over 100 major programs in the first 30 issues: GAMES such as Bots, Othello, Bowling, Golf, Checkers; TECHNICAL such as Memory Dumps, Hex/Binary/Decimal Conversions, Decimal Math, Machine Code; FUN such as Color Chart, 3 Tone Music, Graphics Assembler. Plenty more.

HARDWARE— Subscribers have devised methods of adding printers or keyboards, which we document. We provide you with early news of factory releases.

EXPANSIONS— We are directly involved in working with companies that are now producing memory additions at the 4K and 16K level. These additions include extra features to enhance their use.

INTERFACES— To other computer systems are being developed. The APPLE™ interface is now available, while TRS-80™ and S-100 systems are in work.

REVIEWS— Of commercial programs, using a standardized format for uniformity and objectivity.

AD SPACE— For those who wish to sell the products of their efforts, both hardware and software.

PROGRAM TAPES— Of items published in the ARCADIAN.

SOME TYPICAL SCREEN DISPLAYS:

**ARTILLERY
DUEL**

GOLF

WELCOME TO THE WORLD OF ARCADE PROGRAMMING!

*When you insert your Basic videocade,
you obtain the capability of creating your
own programs!*

If you are interested in continuing your
education in computer operations
(developing games, unique visual and
audio effects, greater understanding of
the tool) —

THEN SUBSCRIBE TO THE

ARCADIAN

This Newsletter provides a forum for
those who want to increase their
knowledge of the features and tech-
niques of the ARCADE, enabling all of us
to benefit.

The ARCADIAN has been publishing
NEWS and DATA since November 1978,
thereby providing the root source of all
user programming for the ARCADE.

WE PROVIDE:

TUTORIALS— Explanations, both
general and specific, how and why the
ARCADE works the way it does. We tell
you how to “translate” from other ver-
sions of BASIC language.
