DEAR BOB:

SORRY FOR THE DELAY IN
REPLYING TO YOUR 'KEYBOARD
SURVEY'! I'M DEFINITELY INTERESTED
IN EXPANDING USAGE OF THE
BALLY SO PLEASE INCLUDE
ME WHEN RELEASING UP TO
DATE INFO.

- ✓ 1. YES → IF HAS THE FULL CAPABILITY
2. YES TALKED ABT (GRAFIX
3. YES 2 GRASS ETC.

IF BALLY DOES NOT COME
OUT WITH A KEYBOARD, I
WOULD WANT A REPLACEMENT
TO BE ABLE TO HANDLE
BALLY GRAPHICS, COLOR, SOUND
AS I FEEL THEIR SYSTEM IS
SUPERIOR TO ANYTHING AVAILABLE

ALSO, THE COMPUTER
MAGAZINES ALL SEEM TO

HAVE ADS FOR AVAILABLE SOFTWARE TO BE USED ON TRS-80, PET, APPLE, ETC. I WOULD LIKE THE KEYBOARD UNIT TO BE COMPATIBLE WITH ONE OF THESE SYSTEMS (THE ONE W/ BEST GRAPHICS { COLOR) TO BE ABLE TO BUY & USE AVAILABLE SOFTWARE DIRECTLY.

I WASN'T SURE IF THE UNIT EVOLVING MENTIONED IN ISSUE #9 WOULD HAVE CAPABILITY OF USING BALLY IN CONJUNCTION W/ THE 16K RAM.

AT ANY RATE, I APPRECIATE YOUR EFFORTS TO KEEP THINGS ALIVE.

MY LAST CHECK WITH BALLY (8/30) REVEALED NO BALLY PIN UNTIL END OF SEP & SPACE INVADERS END OF OCT. DUE TO DELAYS ON PART OF CHIP SUPPLIER.
