

1. - Yes

2. - I'd ~~rather~~ have the Full capacity, but maybe

3. - Yes; of course I'd like to know exactly what would be included.

What is the possibility of increased resolution 16000 points isn't much compared to Texas Instruments new computer and some of the other ones as well as more colors available at one time. TI has 49,000 points & 16 colors. My Arcade is Model # BA-1000-2; Serial # 10421 Purchased MAY 1979.

I would also like to see more info on machine & assembly language programming to get better speed out of games.

Keep up the good work!
