

CHARACTER ANALYSIS

This program will give you a very accurate picture of your own personality based on your selection of the four shapes that will be shown on screen. Use it to analyze your friends character, reveal their innermost thoughts. This is not a game but an analysis which can be suprisingly accurate.

LOADING-Key in :INPUT ;RUN GO Start the tape from the beginning.

WHEN THE SCREEN SAYS "STOP TAPE" PRESS STOP ON THE RECORDER, DO NOT REWIND.

The screen will begin a brief explanation of the program, using knob (1) turn clockwise to speed up the reading of the screen. Turning the knob counter-clockwise slows the reading and scrolling of the screen. This may be helpful when you recieve your analysis and need extra time to think about what is being printed on screen.

The screen will next display four shapes a circle, square, triangle and a squiggle. Using the keypad select the one that appeals to you most and press that shapes number on keypad. Your selection will be displayed below along with the number 1. Now select your number 2 choice, then 3 and 4. each one should be displayed. If you goof up INCORRECT ENTRY will replace your previous selection and then you will start again with number 1. If you change your mind before you have made all four selections key in one that has already been selected. This will display INCORRECT ENTRY and allow you to make a new selection.

After you have made your four choices you will be instructed to start the tape again. The screen will begin flashing color changes for up to 2 minutes as it searches the tape for the correct analysis for your selection. When the computer matches your selection to the proper analysis from tape, it will begin a print-out of your analysis. You may speed up or slow down the print-out using the knob (1).

If you would like to try again with a friends selections, rewind the tape when the screen reads REWIND TAPE FOR NEXT MOTIVATION ANALYSIS. Rewind all the way to the start of the tape. DO NOT HALT THE COMPUTER OR PRESS ANY KEYS. Re-start the tape. The program will load as normal but go directly to the shapes by-passing the instructions.

This program is based on factual data obtained from writings of psychologists in the field of handwriting analysis, and eye and brain studies. It can be very accurate and should not be taken lightly. It may not hit your personality right on the head especially if you are indecisive in making your selections. It is very important that you take your time to be sure of the order you want, before keying them into the computer.
